

# Free Oil Spill Preparedness and Water Pollution Classes!

The communities of San Pedro and Wilmington carry a disproportionate burden of the risks associated with oil operations in and around the Port of Los Angeles. These communities are constantly exposed to the prospects of chronic oil pollution and oil spills which threaten their marine, coastal, and freshwater resources.

Los Angeles Waterkeeper would like to invite the communities of San Pedro and Wilmington to participate in free classes to help residents learn about the natural environment, oil pollution, and oil spill response plans as well as ways to engage in monitoring and clean-up efforts.

## Class Information:

- **Free classes** for interested San Pedro and Wilmington residents.
- Start date: **Tuesday September 29<sup>th</sup>, 2015**
- Classes meet once a week for 6 weeks.
- Meetings will be **Tuesday nights** through November 3<sup>rd</sup> from **6:00-8:30pm**
- Classes held at the **Cabrillo Beach Yacht Club**  
**211 W 22nd St, San Pedro, CA 90731**

## Topics We Will Cover:

- Information about local natural environment in the San Pedro/Wilmington area.
- What to expect from your local, state, and federal authorities during an oil spill response.
- How to conduct water quality monitoring.
- Volunteering and training opportunities related to water quality monitoring and assisting authorities in the event of an oil spill.
